DETAILED ACTION

Allowable Subject Matter

Claims 7 and 24-28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is an examiner's statement of reasons for allowance:

Referring to claims 7, the prior art of record fails to anticipate or rendered obvious the combined elements/steps including, "<u>receiving the announcements at an Internet</u>

<u>Protocol address and port different from an expected announcement Internet Protocol</u>

<u>address and port</u>", as recited in the claims.

Referring to claim 24, the prior art of record fails to anticipate or rendered obvious the combined elements/steps including, "wherein the first location comprises a first network address and port, the method further comprising receiving the announcements at a second network address and port different from the first network address and port", as recited in the claims.

Referring to claim 25, the prior art of record fails to anticipate or rendered obvious the combined elements/steps including, "<u>wherein receiving the one or more special indications at the first location comprises receiving the one or more special indications at a network address and port"</u>, as recited in the claims.

Referring to claim 26, the prior art of record fails to anticipate or rendered obvious the combined elements/steps including, "wherein the first location comprises a

Application/Control Number: 09/321,939

Art Unit: 2614

first network address and port and the second location comprises a second, different network address and port", as recited in the claims.

Referring to claim 27, the prior art of record fails to anticipate or rendered obvious the combined elements/steps including, "wherein receiving the predetermined indication at the first location comprises receiving the predetermined indication at a first network address and port, and wherein identifying the location of the announcement comprises identifying a second, different network address and port", as recited in the claims.

Referring to claim 28, the prior art of record fails to anticipate or rendered obvious the combined elements/steps including, "wherein transmitting the predetermined indication to the first location comprises transmitting the predetermined indication to a first network address and port", as recited in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

In regards to claims 7 and 24-28, only the ATVEF specifies receiving an announcement at a specific Internet Protocol address and port, but only for the currently tuned television channel. Therefore, by using a different IP address and port (which is not supported by the ATVEF specification) to receive announcements, additional data for the currently tuned TV program can be accessed from additional television channels. Furthermore, the ATVEF specification only teaches receiving announcements at an IP

Application/Control Number: 09/321,939 Page 4

Art Unit: 2614

address and port, <u>not the special indication/predetermined indications</u>, which direct a receiver to other channels to receive announcements related to the currently tuned television channel.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason P. Salce whose telephone number is (571) 272-7301. The examiner can normally be reached on M-F 9am-6pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Miller can be reached on (571) 272-7353. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
